

Netflix Data: Cleaning

About Dataset

Netflix is a popular streaming service that offers a vast catalog of movies, TV shows, and original contents. The data consist of contents added to Netflix from 2008 to 2021. The oldest content is as old as 1925 and the newest as 2021. This dataset will be cleaned with PostgreSQL and visualized with Tableau. The purpose of this dataset is to test my data cleaning and visualization skills. This CSV File have attached with cleaned data, if you have found any error/null value then you can follow Data cleaning steps mention below and the Tableau dashboard can be found [here](#) .

Data Cleaning

We are going to:

1. Treat the Nulls
2. Treat the duplicates
3. Populate missing rows
4. Drop unneeded columns
5. Split columns
